

## General Information

|                   |              |
|-------------------|--------------|
| Materiāla numurs  | 48902        |
| Type              | solārā lampa |
| Produktu segments | Ārā          |
| temats            | Solārā       |

## Dimensions

|                               |      |
|-------------------------------|------|
| Izstrādājuma augstums (mm/in) | 310  |
| Izstrādājuma diametrs (mm/in) | 47   |
| Uzstādīšanas dziļums (mm/in)  | 100  |
| Neto svars (kg)               | 0,73 |

## Material & Colour

|                   |                                |
|-------------------|--------------------------------|
| Korpusa materiāls | nerūsējošais tērauds, plastmas |
| Korpusa krāsa     | melns                          |

## Functionality

|                  |             |
|------------------|-------------|
| Slēdža tips      | iesl./izsl. |
| Funkcija         |             |
| Akumulators      | Jā          |
| Akumulatora tips |             |

## Technical Information

|                 |         |
|-----------------|---------|
| Tīkla spriegums | ohne    |
| Darba spriegums | 1,2V    |
| maks. jauda (1) | 6X0,06W |

## Illuminant 1

|                         |           |
|-------------------------|-----------|
| Ietveres tips (1)       | SOLAR-LED |
| Gaismas avota tips (1)  | LED       |
| Gaismas avots iesk. (1) | Iekļautas |
| Light colour Complete   | WHITE     |

|                                                                                  |                                                                                   |                                                                                   |                                                                                   |                                                                                   |                                                                                   |
