

## General Information

|                   |              |
|-------------------|--------------|
| Materiāla numurs  | 48922        |
| Type              | solārā lampa |
| Produktu segments | Ārā          |
| temats            | Solārā       |

## Dimensions

|                               |      |
|-------------------------------|------|
| Izstrādājuma augstums (mm/in) | 822  |
| Izstrādājuma diametrs (mm/in) | 175  |
| Neto svars (kg)               | 0,55 |

## Material & Colour

|                   |              |
|-------------------|--------------|
| Korpusa materiāls | tērauds      |
| Korpusa krāsa     | melns, zelts |

## Functionality

|                  |             |
|------------------|-------------|
| Slēdža tips      | iesl./izsl. |
| Akumulators      | Jā          |
| Akumulatora tips |             |

## Technical Information

|                     |         |
|---------------------|---------|
| Aizsardzības pakāpe | IP44    |
| Darba spriegums     | 1,2V    |
| maks. jauda (1)     | 1X0,06W |

## Illuminant 1

|                         |            |
|-------------------------|------------|
| Ietveres tips (1)       | SOLAR-LED  |
| Gaismas avota tips (1)  | LED        |
| Gaismas avots iesk. (1) | Iekļautas  |
| Kelvin Complete         |            |
| Light colour Complete   | WARM WHITE |

|                                                                                  |                                                                                   |                                                                                   |                                                                                   |                                                                                   |                                                                                   |                                                                                   |                                                                                   |
